

Dear Earthship Enthusiast

We've begun our rebuild. Please join us for tire pounding during the week of July 15-21, 2013.

The site has perfect mountain drinking water, electricity, solar showers and internet.

We are located near Fort Collins, CO, [Directions Here](#). This image is of the beginning of the High Park fire from one of our mountain outlooks.

The site is beautiful & secluded - with excellent Rocky Mountain camping at about ~7500 ft elevation - 15 miles from town.

Linda, fabulous cook is prepared to feed a crew of 15 for the week with primarily vegetarian fare.

Tanner & brothers are very excited to turn these tires into our home.

[Click here](#) to download our [sketchup](#) design to jump-start your own design.

Fun Experiments opportunities:

1. This design is a stretched global, 30x55 global-style living space - with a few modifications. The sun reaches within 8 feet of the back wall and the 15x60 greenhouse has 18 ft ceilings.
2. I've designed a solar refrigerator/heating system based on ammonia with no moving parts driven by the 4500 square foot solar oven that is our roof.
3. We'll use site-cut lumber & sawmill for the structure.
4. Stuff to Bring:
 - Mess Kit, Toiletries, Sunscreen & Hat
 - Tent, sleeping bag & flashlight (cool @ night)
 - Work Clothes & Leather Gloves

Sincerely,
Mark, Linda,
Dakota, Hunter & Tanner Squibb

*All volunteers will be asked to sign a liability waiver

*Children allowed but must stay out of work areas

*Safety equipment - glasses & hearing protection provided
